

**KENYA TEA INDUSTRY PERFORMANCE HIGHLIGHTS FOR NOVEMBER 2024**

**PRODUCTION**

Tea production for the month of November 2024 dropped by 3.49 Million Kgs from 50.90 Million Kgs recorded during the same period of 2023 to 47.41 Million Kgs. Lower production was attributed to generally low and poorly distributed rainfall experienced within the country. Though the month marks the pick of the “Short-rains” season, the amount of rainfall recorded in most parts of the tea growing areas was depressed (near-to-below average precipitation of the amounts usually recorded in the month of November). Unlike low and poorly distributed rainfall experienced in the month of October and November 2024, the “Short-rains” season in 2023 recorded moderate and well distributed precipitation characterized by heavy storms and warmer temperatures, which was associated with El Niño weather conditions.

During the first three weeks of November 2024, most of the tea growing areas within the West of Rift and East of Rift experienced low to moderate rainfall of between 13mm to 55 mm daily with the exception of Embu/Meru catchment, which recorded higher precipitation of ranging from 68 to 145 mm daily. Consequently, production in tea growing areas within the East of Rift was significantly lower by 2.63 Million Kgs from 16.54 Million Kgs recorded in the month of November 2023 to 13.90 Million Kgs. Similarly, output within the West of Rift was lower by 0.85 Million Kgs from 34.36 Million Kgs to 33.50 Million Kgs.

Across the tea manufacturers, the highest drop in production was recorded mostly by the smallholder tea factories managed by KTDA due to their wider coverage in areas that experienced low rainfall conditions within the East of Rift, mostly in Kiambu, and Muranga/Nyeri/Kirinyaga counties. Consequently, production by the smallholder tea factories dropped by 2.16 Million Kgs from 25.01 Million Kgs to 22.85 Million Kgs. Similarly, production by the Estate factories dropped by 1 Million Kgs from 12.80 Million Kgs to 11.79 Million Kgs since they are more widely spread in areas that experienced low rainfall conditions within the West of Rift, mostly in Nandi, Bomet and Kisii/Nyamira counties. Notably, decrease in production by factories in the category of Independent tea producers and Nyayo T. Zones, respectively was insignificant.

# TEA BOARD OF KENYA

*Realizing the Tea Promise*

Cumulatively up to the month of November, production for the year 2024 was higher by 5.18% (26.72 Million Kgs) from 515.92 Million Kgs recorded during the first eleven months of 2023 to 542.64 Million Kgs. Higher production was due to favourable weather recorded during the first four months of the year, which recorded higher rainfall owing to *El-Nino* weather phenomenon.

## TEA BOARD OF KENYA

*Realizing the Tea Promise*

### TEA PRODUCTION TREND (2024 VIS.-A-VIS. 2023)

During the month of November, the volume of speciality teas produced was 864,984 Kgs, which represented 2% of the total production. Speciality teas were dominated by Orthodox teas at 95% (817,475 Kgs) and was largely produced by Estates and Independents tea factories, respectively. The rest of speciality teas consisted of Green and Purple tea produced largely by the Cottage tea industries.

## **TEA SALES**

### **AUCTION**

Auction sales volume for Kenya tea during the month of November 2024 stood at 31.08 Million Kgs, which was lower compared to 33.17 Million kgs recorded during the corresponding month of 2023. The average monthly auction price for Kenya tea was slightly higher at 2.22 USD per Kg against 2.17 USD for the same period of 2023. However, prices of tea followed the quality with “Good” to “Medium” categories across

the grades (well sorted and black appearance in leaf characteristics and brighter infusions and liquors) attracting more competitive bids and considerably higher prices compared to “Lower Medium” and “Plainer” teas and secondary grades, which attracted either less interest and thus discounted prices or no offers and consequently constituted the highest proportion of teas on offer at the auction that were withdrawn. Depending on the quality band, the leaf grades generally attracted relatively higher prices than the dust and secondary grades, respectively.

During the month of November 2024, tea offered for sale by the smallholder tea factories managed by KTDA, whose quality is relatively higher fetched an average price of 2.74 USD per Kg for the main grades against 2.86 USD recorded during the same period of 2023.

Compared to the previous months, absorption for teas offered under the main catalogue was fairly improved at 75%. This followed the suspension of reserve price effective from 30<sup>th</sup> September 2024 and anticipation of higher demand by consumers during the winter season. During the month of November, Pakistan and Afghanistan buyers maintained strong buying support while the Middle East, UK and China had good interest. However, Russia, Kazakhstan and other CIS states showed selective buying support while Sudan and South Sudan maintained steady buying.

Though there was generally improved demand for tea offered at the auction, the prices continued to be impacted negatively by relatively higher supply. The demand for tea at the auction continued to be affected by the effects of global economic shock experienced in most countries due to the Russia-Ukraine crisis and market access challenges owing to internal conflict in Sudan as well as shipment disruptions along the Red Sea.

## **EXPORTS**

The total export volume for the month of November 2024 was lower by 18% (10.33 Million Kgs) from 57.13 Million Kgs recorded in the same period of 2023 to 46.80 Million Kgs. During the month, Kenya tea was consigned to fifty-five (55) export destinations compared fifty-nine (59) or the same period of 2023. Lower export volume was largely attributed to less imports by Pakistan, Yemen, U.A.E and Sudan respectively. However, Pakistan maintained its position as the leading export destination for Kenya tea having imported 16.81 Million Kgs, which accounted for 36% of the total export volume. Egypt was the second largest export destination having imported 7.35 Million Kgs and was followed by U.K (3.12 Million Kgs); Russia (2.29 Million Kgs); U.A.E (2.06 Million Kgs); India (1.81 Million Kgs); China (1.68 Million Kgs); Poland (1.44 Million Kgs); Sudan (1.01 Million Kgs); and Jordan (0.98 Million Kgs).

The top ten export destinations, majority of which are traditional markets for Kenya tea accounted for 82% of Kenya tea export volume. Apart from Pakistan, U.K, U.A.E and Sudan, all the other traditional markets recorded higher imports for Kenya tea. Similarly, emerging markets of Jordan, Switzerland, and Sri Lanka recorded improved imports from Kenya. However, market access challenges continue to face a number of export destinations such as Sudan, North Africa and Europe. For the last one and a half years, exports to Sudan have been affected by internal conflict while attacks on vessels along the Red Sea by Yemen Terrorist group has continued to affect shipments

# TEA BOARD OF KENYA

*Realizing the Tea Promise*

to markets in Europe and North Africa. Despite these challenges, other destinations such as Russia, India, China, Chad and South Sudan have continued to expand rapidly as key markets for Kenya tea. Following disruption of its import transshipment route through Sudan due to internal conflict, Chad has resulted to direct importation from Kenya through Nigeria and Cameroon as alternative transshipment routes. There were also shipments to seasonal markets such as Georgia; Morocco; Austria; Argentina; Mozambique; Cyprus; and Syria, which were largely in value added form. During the month of November, value added tea exports amounted to 918,753 Kgs, which represented 2% of the total exported volume. The exports in value added form were shipped to sixteen (16) market destinations which included UK; Sudan; Somalia; Oman; Cote D'Ivoire; USA; Ireland; Burkina Faso; Malaysia; Syria; Niger; U.A.E; South Africa; China; Poland; and Belgium.

Out of the total exports of value-added tea, United Kingdom accounted for the highest volume at 34% and was followed by Sudan at 14%. Somalia and Oman accounted for 12% and 11%, respectively. Other significant importers of value-added teas included Cote D'Ivoire; USA; Ireland; and Burkina Faso.

During the eleven-month period of 2024, cumulative tea export volume was higher by 16% (75.95 Million Kgs) from 471.68 Million Kgs recorded in the same period of 2023 to 547.63 Million Kgs. The export earnings was also higher at Kshs 169.49 Billion against Kshs 161.70 Billion for the same period of 2023 on account of higher export volume and stable exchange rate to the USD.

## **LOCAL TEA SALES**

Local tea sales for November 2024 was lower at 3.26 Million Kgs compared to 3.31 Million Kgs recorded in November 2023 and 3.28 Million Kgs recorded in the corresponding month of 2022. Cumulatively, tea sales for the first eleven months of 2024 was slightly lower at 33.83 Million Kgs against 33.84 Million Kgs for the same period of 2023 but higher compared to 31.17 Million Kgs for the period January to November 2022.
